BACKGROUND

The objective as stated in the National Development Plan is to ensure that the airport as a main gateway to Montserrat has the continued capacity to facilitate trade and other social and economic activities for the common good of all. Aviation Security is thus very critical and GoM must therefore do whatever is necessary to prevent the occurrence of acts of unlawful interference against aircraft operations through the deployment and use of competent personnel and efficient and up to date facilities. The absence of a serviceable Explosive Trace Detector (ETD) was cited by the U.K. Department for Transport DfT Aviation Security Inspector when he declared “the ETD was not serviceable and this distracted from the overall security regime. The airport should ensure that an adequate ETD is in place so as to provide the full level of security measures available to the staff”.

With ASSI taking over the responsibility as of 1st April 2015 for the regulation or regulating of AVSEC operations at the airport and which has implications for the continued maintenance of the aerodrome certificate, this shortcoming was again flagged during the AVSEC audit which was conducted in May 2014.It was requested of the regulator that we are given until August 2015 to remedy this situation; which can be fixed through the acquisition of the ETD.

The procurement and installation of the ETD will provide the airport with the suitable device that has the capacity to detect prohibited substances and explosive materials as that is lacking at this time. That would place the airport in a better position in terms of compliance with AVSEC requirements in general.

SCOPE OF WORKS

The Ministry of Communications, Works and Labour invites tenders from suitably qualified service providers for the supply and installation of Explosive Trace Detector at the John A. Osborne Airport.

AFTER SALES SERVICE AND REFERENCES

The proposals or bids must provide confirmation of the ability to provide reliable after sales service in order to ensure minimum equipment downtime. The annual cost of this must be detailed. Tenderers should provide a list of at least three customers with whom they have had service contracts for a minimum of two years.

TRAINING AND CERTIFICATION

Tenderers should ensure that their proposals provide confirmation that all users of the equipment will be trained in their operation and become certified users. A maximum participation to the training session is 20 attendees. These include chief security officer, operations manager and other security officers. All training and supporting documents will be provided in English.
WARRANTY AND DEFECT RECTIFICATION

Each tenderer or bidder should propose the level and extent of warranty, in the interest of the client, the Government of Montserrat, that would be associated to the quality of the works to be undertaken. The period of defect rectification, for which the contractor will be responsible, will begin at the end of the project and will run for a minimum period of two years.

PAYMENT:

The proposals or bids should include the suggested terms of payment for the consideration of the Public Procurement Board. A full breakdown of all costs must be given in relation to the work to be undertaken in this project; which includes the supply and installation of the requisite equipment and training cost.
