

TENDER FOR THE SUPPLY OF STUDENT LOCKERS TO THE MONTserrat SECONDARY SCHOOL

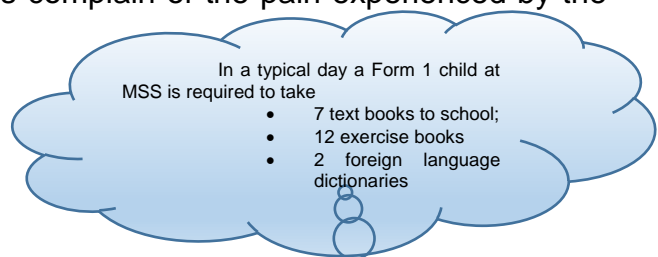

BACKGROUND

Several years ago, the ownership of the school's learning spaces was changed. The rooms were previously assigned to classes of students but because of, concerns about the care of the rooms they were placed in the care of the teachers. Since then the teachers have transformed the learning spaces teaching/learning environments which are conducive to learning.

The transfer of the rooms to the teachers resulted in the students having to move between learning spaces with their bags which are often very heavy. Very often to compensate, the students would either leave their books at home or at school. Therefore, either homework or classwork would be neglected.

Additionally, students and their parents complain of the pain experienced by the students, associated with carrying a heavy bag around for extended periods over the course of the day.

Further, students have lost books, equipment, money and other personal items from their bags which may have been left in a classroom because it was just too heavy to tote around the school with them.

In addition there are atypical days where they are required to bring changes of clothes to school for PE, wood work or other such activities which require changes of clothing.

At the moment they have no secure place to store all of this kit and are therefore required to lug all of that weight around the compound all day. This is an unreasonable expectation which borders on abuse and is unsafe unethical and not in keeping with sound child safeguarding practices.

Objective

The objective of this procurement is to reduce the impact on the students associated with having to carry a heavy bag around the school for extended periods over the course of the school day.

Specification and requirements for the student lockers

This tender is for the supply of school lockers for students use. The following are imperatives of the lockers:

- The lockers should provide individual secure spaces for at least 375 pupils;

- Ideally and because of space considerations, a triple tier locker unit best suit our needs. The total height of each unit must not exceed 40 inches.

Figure 1 The photo below is an example only as to the expectations of this tender

- The method of providing security for each child should take into consideration the possibility of students losing their keys and the cost associated with their replacement;
- The construction material should be sufficiently robust to withstand a harsh environment. It is envisaged that in some cases the lockers will be located in covered walkways and thus exposed to some aspects of environmental elements;
- The lockers should be durable and light weight to enable relocation within the school when necessary;
- The colours of the lockers should be varied in groups of 25 using primarily black, blue, red, green, brown and shades thereof.

EVALUATION OF TENDERS

All tenders will be evaluated based on the criteria below and the successful bidder will be that which has amassed the highest score.

The evaluation will assume a two-stage process:

Administrative compliance

At this stage bids will be checked to ascertain the following:

- Was the bid received before the deadline?
- Was the bid packaged as instructed the 'instructions to tender'?
- Were all of the required documents completed and signed as required?

- Were all of the mandatory documents on the check list provided with the bid?

If the response to any of the questions above is negative the bid will be quite likely to be rendered non-compliant and the bid so rendered will not be considered for further evaluation.

Technical compliance

The technical compliance consideration will be based on the extent to which the selected lockers meets the needs of the school as described in this tender document.

The consideration will be as follows:

CRITERIA	MAXIMUM POINTS
The strength and durability of the lockers proposed must be in line with required manufacturing standards and product assurance and product life span.	15
The light comparative weight of the locker sets;	10
The volume of each individual locker space (height, weight, depth, capacity)	15
The security arrangements of the contents for each lockers to include replacement locks, keys	10
The cost per individual locker;	45
The delivery time	5
TOTAL	100

The durability and strength of the lockers proposed (15%)

It is expected that in some cases the lockers will be sited in covered corridors and walkways. They will therefore suffer some albeit limited exposure to the elements of salty air and moisture. In addition, the environment is susceptible to termite attack. The lockers will need to be able to withstand this aggressive environment.

There is possibility that some students may try to gain access to a locker because they have lost their keys or they may try to gain access to someone else's. Hence the lockers should also be strong enough to withstand most attempted break-ins or intentional damage

Evidence must be provided of the lockers meeting manufacturing standards, quality assurance, product life expectancy guarantees

The submission which best meet these criteria will be scored up to 15 points and all other sub missions will be scored accordingly.

The light comparative weight of the locker sets (10%)

It is expected that the lockers will be joined up in sets. The weight of each set of lockers while increasing stability will certainly reduce mobility. In times of bad weather, lockers should not be left outdoors.

Bidders will need to indicate the unit weight and the bidder with the lightest weight per ten (10) locker cubicles will be scored up to a maximum of 10 points. All other bidders will be scored accordingly.

The number and volume of each individual locker space (15%)

The individual space within each locker is referred to as cubicle (compartment) in this tender document.

Each cubicle must meet a minimum of 1440 cubic inches but this value has to be properly dimensioned. Books are usually square or rectangular in shape and the dimensions of the individual cubicle must be such as to accommodate most books even if they have to be oriented diagonally within the cubicle.

Each bidder will be scored according to their ability to meet a 12inch by 12inch by10inch dimensions and the bidder which is able to meet the minimum dimension requirements will be scored appropriately. All others will be scored relative to the best submission on this criteria.

The security arrangements of the contents for each lockers (10%)

The lockers will need to be secured against unauthorized entry. The bidders must indicate the type of security arrangement which is incorporated in the design and replacement costs for keys/locks.

The bidder which provides the best security while also considering the issues of lost keys will be scored on this criteria and all others will be scored accordingly.

The cost per individual locker space (45%)

If one considers technical compliance being divided into 2 elements, namely the cost of the item versus the other technical characteristics described above taken as a whole, cost is only slightly less critical. However when each individual technical characteristic is considered the cost far outweighs each.

The bidder which proposes the best cost per cubicle is scored appropriately and all others will be scored relatively.

The delivery time (5%)

Ideally it is hoped the lockers can be delivered and ready for use within Term 1. The Bidder with the shortest delivery time will be given an appropriate score and all others will be scored relatively.

TENDER CHECKLIST

The following documents should be provided for a tenderer's bid to be valid. Bidders are asked to supply and tick off the following information. Failure to provide any of the stated documents may result in the bid being considered noncompliant and rejected:

1. Completed and signed Form of Tender. The form of tender document shall be signed by the person legally authorized to bind the firm to a Contract.
2. Identification details of the Tenderer's business
3. Tax/Social Security compliance certificate (if locally based)
