Tenders are to be received no later than 12:00 p.m. on Friday 4th. January, 2018.

Yours Sincerely

Sylvan Roberts, Head of Statistics

Tender for the Supply of a Diesel Engine driven Electric Generating Alternator for the SDM/MOFEM

BACKGROUND

The SDM now occupies their new premises in Saint Johns with staff offices both in the lower and upper stories. The department has procured and will continue to procure appropriate equipment to enable the delivery of its mandate and the availability of continuous electricity is essential in ensuring this.

The generator will have the capacity to be automatically started as soon as there is an electrical blackout, thereby enabling continuous work and the full safety of the databases. This is extremely essential in going forward as our databases expand and security and safety, as well as work continuity becomes much more crucial.

Objective

The procurement of the generator is indispensable to the production of a reasonable quantum and quality of data that are essential to support evidence based planning and decisions. Evidence based planning and decision making together comprise a key goal of the Sustainable Development plan.
